[Web] Do not Allow Special Characters, digits in the first name, last name and Father Name input Field

Description:

Steps:

1. Visit Buggy website page and type first name, last name, father name in the input fields.
2. Now type some special characters/digits with the first name, last name, father name

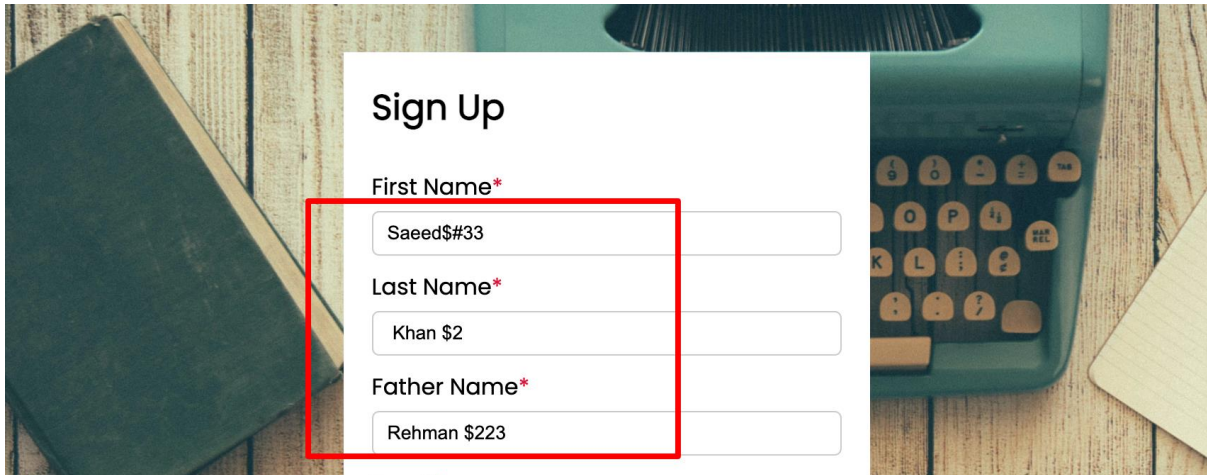

Current Behaviour:

The user can type special characters/digits in the first name, last name and father name

Expected Behaviour:

The users should not be allowed to type special characters and digits in the first name, last name, father name,

Screen Shot:

Dev-1002

[Web] The popup message “Name can't be empty” for the last name and father name is incorrect.

Description:

Steps:

1. Visit buggy website page fill all the required fields
2. Leave the last name input field empty and submit the form
3. The popup message shows for the last name “Name can't be empty”
4. Click ok and again fill all the required fields and leave the father name input empty
5. Click on the Submit button, the error message “Name can't be empty” for the father name required.

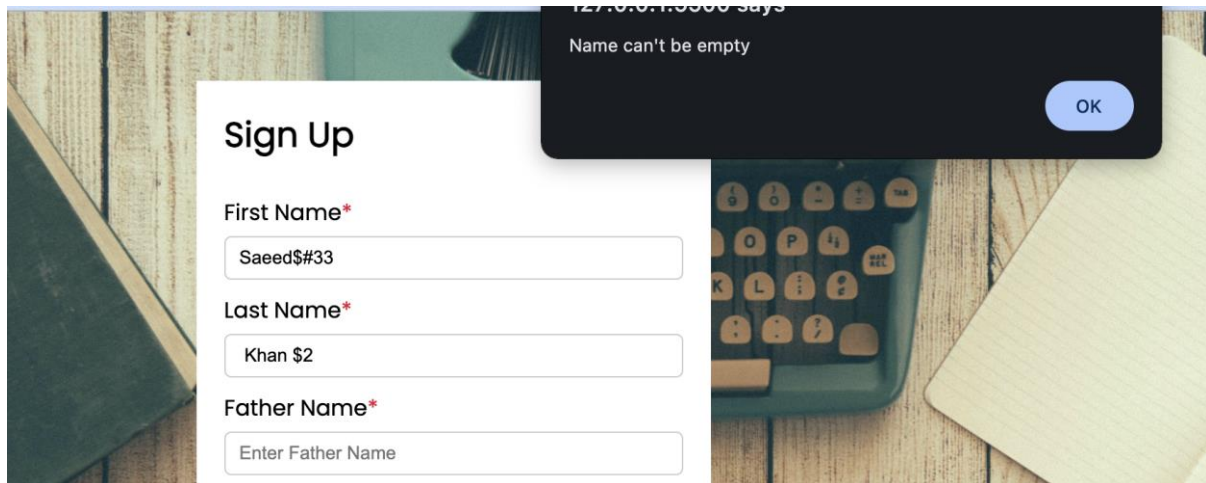

Current Behaviour:

The required popup message is same for the last name and father name when the user submit the form without last name, father name.

Expected Behaviour:

1. Show error message “Last Name can't be empty” when the user submit the form without last name.
2. Show error message “Father Name can't be empty” when the user submit the form without father name.
